SECURITY PRINTING

PROJECT INTRO

Many clients have approached Apache Superior Printing with a desire to implement a printed contest promotion, but are often overwhelmed by the endless tasks associated with it.

Not only can Apache provide a superior quality product incorporating scratch off foils and unparalleled print quality, but they also maintain and execute the complicated logistics of running a contest.

Contests are a great way to promote your business and Apache can show you how.

- 1 COLLATING IS ESSENTIAL TO ENSURE PRIZES ARE EQUALLY DISTRIBUTED THROUGH A PRINT RUN
 - 2 "CHAIN OF CUSTODY" AND INTERNAL SECURITY PROTOCOLS PREVENT CONTEST FRAUD
 - 3 COATINGS PROMOTE EASY REVEALS OF RESULTS FOR USERS
- Scratch tickets require great attention to detail, such as information security, equal distribution, proper delivery and variable data printing.
